

EXPLANATION OF FLAT, 2D & 3D DESIGNS

Flat – a flat design is as the name suggests a 1 layer design of the same level albeit various segments making up the design

2D – a 2D design has raised layers and the layers can be of various heights but each layer is a uniform height.

3D – a 3D design has a prominent curved surface and within the surface can be various layers but overall it's curved
